

NEW Spine™ DRIVER

The innovative crown super-structure – or ridge line – featured on the high MOI Spine driver.

High MOI. The new Spine achieves high MOI and low CG by redistributing weight from the center and crown to the perimeter. This also creates the spine – or ridge line – that reinforces the face behind the impact area. The result is the industry's first perimeter weighted driver with a higher MOI and lower CG than traditional 460cc drivers.

NEW FYbrid®

FYbrid clubs feature the perfect combinations of loft and length to deliver consistent distance gapping between clubs.

Women's FYbrids. Women's FYbrids offer the same distance gapping solutions as the men's versions, with a softer graphic and higher lofts.

Luxe® IRONS

As beautiful as it is to look at, the Luxe iron will also exhilarate with its combination of power and control. With smaller grips and lighter shafts, Luxe delivers high clubhead speed for longer distance.

Designed Specifically for Women. Three key features support the Luxe iron's unmatched power and control:

- A low profile head moves the center of gravity (CG) down for higher ball flight.
- A wide sole moves the CG back for greater stability.
- Torque control has been designed into the Luxe shafts delivering outstanding forgiveness on off-center hits.

Luxe[®] WOODS

Performance moves from the tee to the fairway with driver, fairway woods and hybrids that get the ball airborne quickly for soaring distance.

Luxe Driver. Weighted in the back the 460cc driver promotes a lower CG for a higher launch angle and preferred minimal driver spin. The driver head allows for maximum volume with a superior sweetspot and more forgiveness.

Fairway Woods. Featuring the same smoke black finish as the driver, with 18° and 22° options for higher ball flight.

Precision Loft Hybrids. A selection of hybrids delivers easier to hit options from longer fairway and rough lies.

Classic Design & Soft Feel. A classic design with soft TPU urethane insert provides confidence at address and truer roll at impact. An Anodised Aluminium plate provides superior roll and feel.

Luxe[®] PUTTER, GOLF BALLS & GLOVES

Feel is at the heart of Luxe putter, golf ball and glove performance. Whether the luxurious 50 compression of the golf ball or the luxurious cabretta leather incorporated in the glove, there's nothing on the market that offers a smoother, more satisfying feel than Luxe.

Women's Golf Balls. Feel is at the heart of Luxe golf ball and glove performance. Whether the luxurious 50 compression of the golf ball or the luxurious cabretta leather incorporated in the glove, there's nothing on the market that offers a smoother, more satisfying feel than Luxe.

Women's Gloves. High performance microfiber synthetic for unsurpassed fit and exceptional durability. Premium Stay Soft cabretta palm and thumb for added comfort and durability, DuPont Lycra gussets for enhanced fit and moisture management.
